Akash tripathi

Winner at tcs HumaIn 2019

1. TCS HumAIn is a contest by the Enterprise Intelligent Automation & AI Unit of TCS. Registrations were open from June to August and there were two rounds for first screening, namely, including Python, Object oriented programming and ppt submission. The next step was to publish a video on YouTube about the solution followed by 2 telephonic interviews of 15 minutes each. Among these top 20 contestants were selected for finale among 28,000 participants from all over India. These 20 students were asked to present their solution before the AI head of TCS. Through this, top 5 were selected for final presentation. There was a crowd of 500 people with Founder of TCS, AI head and Anna Durai from Chandrayaan project. He presented with honesty about the dataset they provided with industry level presentation. Akash won the finale Winning a cash prize of 3 Lakhs, a trophy of winner, a trophy for "most popular" award and a trophy for top 20 contestants. The problem statement he worked upon was "Facial Recognition and Gender equity facial expression".
